I'm a 2d year dental student and this was a good summary about buying with actual examples and numbers. It gives a basic framework of comparison for hygiene production, overhead etc. Best 1\$ I spent today (and it's a 1 day read). Thanks David!

Every graduating dentist should be given this booklet. It would save them much pain and frustration. As dentists we are not given any real business knowledge. Since the people we work with are the

true value in the dental practice, some knowledge of how to manage people and make their life enjoyable while they are at work will make for the best of all worlds. This publication will allow you to get a grip on the skills that one really needs to be successful.

I have been a dentist for over 30 years and I'm at the point in my career to evaluate my practice for future sale. This book has been a great tool to help me evaluate my practice and to improve certain areas to attract potential buyers. It helped me understand the areas a younger dentist has to consider in order to evaluate a practice. To the point and easy to read.

Buying a practice can be stressful and confusing, this book helps explain the basics of valuation and revenue calculation. I'd recommend it as a quick but important read to help you understand how to choose that perfect practice.
