Dreams are something most of us have in life. They can be scary, thought provoking, warnings, and sometimes erotic in nature. They are often something we keep private unless we feel like sharing with others. They are something we have the ability to control, well so we think. There are stories in Native American folklore of those who can walk within dreams. These individuals are able to implant themselves into a dream and control what happens. They could fill your dream with so much fear it literally scares you to death. There is then the flipside to that coin in which the dream is so sensual you are filled with great emotions. The question then becomes what to do with such a gift if you happen to be one of these people. This is the question that is asked as you read the book, Shaman's Gift: The Awakening, by author VR McCoy. The book introduces the reader to an inmate of a mental hospital, one Christian Sands. A former contractor for the FBI that had some falling out with his bosses which landed him in this hospital. Christian begins to tell his story after a brief background on who he is. You will learn that when he first learned about his gift he eventually made himself the target of the affection of many women. He just had to dreamscape with them and plant the seed of how great it would be to be with him. These women would bring themselves to him, but after a time he realized what he was doing wasn't right. It was the start of a process of growing up for the character that would lead to his job with the FBI. A job that would put him into the middle of a case that would lead him to further discovery of his roots, and what his gift can really do.
