## Synopsis

Welcome to New York City, Population Zero? The power grid has collapsed. There is no running water, no light, no heat. The massive neon signs of Times Square are dark now, and the subway trains crouch silent in their tunnels, waiting for commuters who will never return. An epidemic of staggering lethality has passed over the city and left nothing living in its wake. And yet the city is not deserted. The dead have returned to life, and they're hungry. The millions of people who once worked and lived in New York have been turned into cannibalistic monsters whose only function is to consume. No living person would dare enter the city--it would be suicide. Dekalb doesn't have a choice. He must protect his daughter's future, and that means retrieving vital medical supplies from the UN building in Midtown. A cadre of teenage girl soldiers have been recruited to help him find what he needs, and get back alive. They're well armed. They're devoted to their mission and willing to sacrifice anything to pull it off. But the odds against them are staggering. Especially when it turns out that not all zombies are created equal. Deep inside the city a medical student named Gary comes back from the dead different--his mind is intact. He can still think and feel. He's hungry, just like the rest, but unlike them he can plan, plot, and scheme. He can even lead the others, bending them to his will. Soon he has a small army at his command, a growing mob of rotting corpses all devoted to one cause: to find meat for their master. When Dekalb and Gary cross paths sparks will fly, destinies will clash--and the future of humanity will be decided, one head shot at a time.Â

## Customer Reviews

I read *Monster Island* and this is a good side by side story along with that. It is a flashback to the beginning of things, providing a clearer idea of why the undead have started walking and a little more detail on our ancient scottish undead chap that was in the first novel. Unlike the first book, this one really cannot stand on its own as I am sure the series of events will be completed in *Monster Planet*, the third and final (I assume) installment in this series. Mr. Wellington does a good job of creating a realm where the supernatural is the cause of the dead rising as opposed to a virus or a more scientific reasoning. We are slowly given an idea of how this threat developed and where it came from. Even though it came from human actions, ancient gods are behind the desire to see the human race wiped clean off the planets surface. This book is even more focused on a specific undead character than *Zombie Island-Nilla*, who chose her own name after becoming undead because she cannot remember her name, nor anything of her own past before being bitten by a zombie herself and dying. She continued to take in oxygen while dying and thus her brain did not deteriorate. The story pretty much follows her storyline as well as Clark Bannerman, a Captain with the National Guard who is forced to become the lead in the military battle against the undead in the western states. He pursues Nilla after realizing that she is the only undead person that can still speak. He knows that she is a key to resolving this issue, even though he does not know why. Overall, the story flows quite well and is definitely entertaining.
